Steel Wire for Mechanical Spring

- **Product description:**

Zanjan wire's spring wire is hard drawn and delivered in bright-drawn Black or in coated condition depending on request.

A variety of mechanical springs can be rolled into springs. Torsion springs spring belt and so on.

- **Product Standard**

ASTM A227

BS EN 10270-1.2.3

- **Technical Specification**

ASTM A227		
Wire Diameter (mm)	Tensile Strength (MPa)	
0.50-5.00	Class I	Class II

BS EN 10270-1					
Wire Diameter (mm)	Tensile strength (MPa)				
0.50 - 5.00	SL	SM	SH	DM	DH
SL=low tensile strength , DM=medium tensile strength SM=medium tensile strength , DH=high tensile strength SH=high tensile strength					

- **Packaging:**

Based on the order in different types of pulleys, the coils are also cut
